CHENNAI GAMES – INTERNSHIP MEETING REPORT Weekly Review & Feedback Meeting	
Team Members	Rakesh K-IV/CSE, Bala Subramanian G - IV/CSE, Rithiya M - IV/IT, MenagaR.K- IV/CSE, Sathasivam III/CSE.
Staff Incharges	Mr.J.Karthikeyan AP(SG)/CSE Mrs.R.Vazhan Arul Santhiya AP/CSE
Focus Group	AR/VR

MEETING 1 – REVIEW

Date: 27/08/2026 | Duration: 12:00 PM – 1:00 PM | Venue: IP Lab

Purpose of the Meetings

The meetings were conducted to review the progress of the Chennai Games internship, discuss the work completed by each team member, identify areas for improvement, and collect feedback for the next phase of development.

Rakesh K

Meeting 1 – 27/08/2026

S.No.	Feedback / Observation	Action / Improvement
1	Improve the Game UI	Improved
2	Make the Zombies stay in land rather than flying.	Improved
3	Make them shoot fireballs at the player.	Improved
4	Enhance the game mechanism and solve the bugs	To be incorporated in the next phase
5	Add wave form (wave 1, wave 2,etc) to make the game more interesting	Improved

Bala Subramanian G

Meeting 1 – 27/08/2026

S.No.	Feedback / Observation	Action / Improvement
1	Add advanced features to the project.	Implement new gesture controls.
2	Explore OpenCV and MediaPipe applications.	Study X-ray and real-world applications.
3	Learn OpenCV and MediaPipe in depth.	Practice advanced concepts.
4	Develop complex and innovative projects.	Build new computer vision projects.
5	Improve practical knowledge.	Work with real-world datasets

Sathasivam

Meeting 1 – 27/08/2026

S.No.	Feedback / Observation	Action / Improvement
1	Improve overall character proportions and silhouette.	Refine the primary forms of the head, neck, and shoulders.
2	Maintain proper facial proportions and symmetry.	Refine the eyes, nose, lips, jaw, and chin using facial landmarks.
3	Develop the character systematically from large to small forms.	Follow primary → secondary → tertiary sculpting stages.
4	Enhance facial features while retaining the stylized appearance.	Refine facial planes, eyelids, eyebrows, lips, ears, and jaw.
5	Improve hair design and character-specific details.	Create grouped hair masses and refine accessories and facial hair.
6	Ensure the model is consistent from different viewpoints.	Check and correct the sculpt from front, side, three-quarter, and perspective views.
7	Prepare the character for final production.	Complete hair design, retopology, optimization, and game-ready asset preparation.

Rithiya M

Meeting 1 – 27/08/2026

S.No.	Feedback / Observation	Action / Improvement
1	Improve the UI	Improved
2	Finish-point interaction	Improved
3	Player enjoyment	Improved
4	Level design to make Climb2Sky more attractive	Improved
5	UI improvement suggestions from Santhiya Mam.	Suggestions implemented

Menaga R.K

Meeting 1 – 27/08/2026

S.No.	Feedback / Observation	Action / Improvement
1	Improve the UI	UI improved with better interface design and a mute button for game sound.
2	Improve level design	Level design improved with 4 levels, each having increased difficulty and different enemies.
3	Improve level progression	Players can proceed to the next level after completing the current level.
4	Add leaderboard	Leaderboard added with player name entry and best-score display when starting the game.
5	.Improve player enjoyment	Multiple levels, different enemies, progressive difficulty, leaderboard, scoring, and sound controls implemented to improve the overall gameplay experience.

MEETING 2 – REVIEW

Date: 10/09/2026 | Duration: 12:00 PM – 1:00 PM | Venue: IP Lab

The second meeting focused on reviewing the progress made after the first feedback session. The following points summarize the review feedback and the improvements expected for the next stage.

Rakesh K

Meeting 2 – 10/09/2026

S.No.	Feedback / Observation	Action / Improvement
1	Make the game environment bigger	To be incorporated in the next phase
2	Add up shooting material to the player also.	Improved
3	Add more difficulty in the game	To be incorporated in the next phase
4	Watch and play the game "Into the dead"	To be incorporated in the next phase

Balasubramanian G

Meeting 2 – 10/09/2026

S.No.	Feedback / Observation	Action / Improvement
1	Make the game more interactive and physically engaging.	Develop a motion-based physical activity game.
2	Use computer vision to track full-body movement.	Implement body tracking using MediaPipe.
3	Player should physically move to avoid obstacles.	Add balls/objects coming from different directions.
4	Improve the project with real-time gameplay.	Add collision detection, score and levels.
5	Combine gaming with physical exercise.	Measure player movement and activity during gameplay.

Rithiya M

Meeting 2 – 10/09/2026

S.No.	Feedback / Observation	Action / Improvement
1	Gameplay screen improvement	Improved
2	Increase UI size by +1 level	Improved
3	Consistent design across all screens	Maintained a consistent design, layout, and visual style across all game screens.
4	Mobile portrait responsiveness	Improved mobile portrait responsiveness by adjusting UI scaling, alignment, and element positioning for different screen sizes.

Menaga R.K

Meeting 2 – 10/09/2026

S.No.	Feedback / Observation	Action / Improvement
1	Improve background movement	Implemented parallax movement for the background to create a smoother scrolling effect and give the game a better sense of depth and continuous movement.
2	.Improve the UI	Improved the overall UI layout, alignment, buttons, and visual elements to make the game interface more attractive and user-friendly.
3	Improve level design and alignment	Improved the level design and alignment of game elements, including pipes, enemies, obstacles, and other objects, to provide a more organized and balanced gameplay experience.
4	Reduce the difficulty of the levels	reduced the difficulty of the levels
5	Improve overall gameplay experience	Made the gameplay smoother and more balanced by combining the UI improvements, parallax background movement, better level alignment, and reduced difficulty.

MEETING 3 – REVIEW

Date: 17/09/2026 | Duration: 12:00 PM – 1:00 PM | Venue: IP Lab

The third meeting focused on reviewing the progress made after the second feedback session. The following points summarize the review feedback and the improvements expected for the next stage.

Rakesh K

Meeting 3 – 17/09/2026

S.No.	Feedback / Observation	Action / Improvement
1	Develop unique zombies in each wave.	Keep unique powers for every zombie appearing in each wave.
2	Prepare a Design Document in which it should contain all features about the Game.	Clarity in each content needed.
3	Enhance the UI and make the Game environment wider.	Looking forward to the UI design.
4	Make the Product in a earning way and look into the revenue.	Turn highly requested advanced features into paid add-ons or higher subscription tiers.

Balasubramanian G

Meeting 3 – 17/09/2026

S.No.	Feedback / Observation	Action / Improvement
1	Replace the capsule with a human player character.	Integrate a realistic human character.
2	Make the game more realistic and full-fledged.	Improve gameplay, environment and mechanics.
3	Improve the overall player experience.	Add animations and realistic interactions.
4	Understand the C# scripts used in the project.	Study and understand each script and its functionality.
5	Improve the project implementation.	Refine existing features and fix issues.

Rithiya M

Meeting 3 – 17/09/2026

S.No.	Feedback / Observation	Action / Improvement
1	Player-to-platform distance was too long, affecting smooth gameplay progression.	Adjusted the player-to-platform distance to ensure proper landing and smoother gameplay progression.
2	Mobile portrait layout	Adjusted the game layout for mobile portrait mode with proper UI alignment and responsive scaling.
3	Added situation-based audio effects and implemented proper player destruction and respawn when entering the death zone.	Added situation-based audio effects and implemented proper player destruction and respawn when entering the death zone.
4	Scoreboard alignment was adjusted for a clean and consistent placement across different screen sizes.	Adjusted the scoreboard alignment for clear visibility and consistent placement across different screen sizes.
5	Studied and understood the C# scripts used in the project to control and manage the game mechanics.	Studied and understood the C# scripts used in the project to control and manage the game mechanics.

Menaga R.K

Meeting 3 – 17/09/2026

S.No.	Feedback / Observation	Action / Improvement
1	Bird should be appear with the particle effects	Adjust the rendering/sorting order so that the bird is displayed behind the particle effects, creating a better visual effect.
2	A scroll panel is needed for the leaderboard.	Add a scrollable leaderboard panel so that multiple player scores and names can be viewed easily without making the UI too large.

3	Navigation Between game screens needs improvement	Implement clear and consistent navigation between the Start Panel, Game, Leaderboard, and other screens.
4	The player's name should be saved automatically.	Store the player's name so that they do not have to enter it again after returning to the Start Panel or revisiting the leaderboard.
5	Pause, restart, and back buttons are required.	Add functional Pause, Restart, and Back buttons to give players better control over the game and navigation.

Overall Meeting Summary

- The team reviewed individual progress and discussed improvements required for the Chennai Games internship work.
- Common feedback included better documentation, systematic testing, clearer presentation, timely completion, and stronger team communication.
- The next meeting was used to follow up on the first meeting's feedback and review progress on pending improvements.
- All members were encouraged to incorporate the feedback into their respective responsibilities and prepare the work for the next review.
- Chennaigames assured to give internship for all students and based on the performance it will be converted to Full time placement offer.
